Summary Statistics
Consensus quality: 140723 bases at least Q40
Consensus quality: 148960 bases at least Q30
Consensus quality: 151290 bases at least Q20
Consensus quality: 151290 bases at least Q20
Estimated insert size: 98000; pulse field gel estimation
Estimated insert size: 157572; sum-of-contigs estimation
Quality coverage: 7.39 in Q20 bases; pulse field gel estimation.

* NOTE: This is a 'working draft' sequence. It currently
consists of 16 contigs. The true order of the pleces
tonsists of 16 contigs. The true corder of the pleces
arbitrary. Gaps between the contigs are represented as
truns of N, but the exact sizes of the gaps are unknown.

This record will be updated with the finished sequence

Submitted (02-NOV-2001) Production Sequence quality, on Nov 2, 2001 this Sequence Version replaced gi:768997(
This entry has been annotated with sequence quality assessment:

This entry has been annotated with sequence quality estimates computed by the Phrap assembly program.

All manually edited bases have been reduced to quality estimates computed by the Phrap assembly program.

All manually edited bases have been reduced to quality levels above 40 are expected to have less than Base-by-base quality values are not generally visible fenBank flat file format but are available as part of this entry's Assistance.

/note="Vector: PWD42ny; Purified genomic DNA from M.
musculus C57BL/6J (male) was obtained from the Jackson
Laboratory Mouse DNA Resource
(http://www.jax.org/resources/documents/dnares/). The DNA
was hydrodynamically sheared by repeated passage through a
0.005 inch orifice at constant velocity. The sheared DNA
was blunt end-repaired with T4 DNA polymerase and T4
polynucleotide kinase. Adaptor oligonucleotides were
ligated to the blunt ends in high molar excess. The
adaptored DNA was purified and size-selected for a 9.5 to
10.5 kb range using preparative agarose gel
electrophoresis. Vector DNA was prepared from a derivative
of pWD42 (gil4732114|gb|AF129072.1), a copy-number
inducible derivative of plasmid R1. The vector was ligate
with adaptors complementary to the insert adaptors and
""crtor DNA, and transformed into
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                igated

BI824736 603033615F1 NIH_MGC_115 Homo mRNA sequence.

DEFINITION

```
/note="Organ: pooled brain, lung, testis; Vector:
    pcMV-SPORT6; Site_1: NotI; Site_2: EcoRV (destroyed); RNA
    source anonymous pool of 6 male brains, age range 23-27; 1
    male lung, age 27; and 1 male testis, age 69. Library is
    oligo-dT primed and directionally cloned (EcoRV site is
    destroyed upon cloning). Average insert size 1.8 kb,
    insert size range 1-3 kb. Library is normalized and
    enriched for full-length clones and was constructed by C.
    Gruber (Invitrogen). Research Genetics tracking code
    021. Note: this is a NIH_MGC Library."

/note="Organ: lung; Vector: pT7T3D-Pac (Pharmacia) with modified polylinker; 1st strand cDNA was prepared from pooled lung tumor tissue, and was then primed with a Not oligo(dT) primer. Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and Eco RI sites of the modified pT7T3 vector. Library went through one round of normalization. Library constructed by Bento Soares and M Fatima Bonaldo. "
